

SAHRIS OBJECT PDF REPORT

Object Code: UP-Skeleton Samples for DNA and C14

Quantity: 36.00

Cultural Association:

Maker:

Production Place:

Description:

Sample materials for a DNA extraction (and C14 dating where relevant) from human remains (in particular bone and parts of teeth), curated at the University of Pretoria. This forms part of a larger initiative to trace the broader population history of southern Africans. There are twelve materials with three separate samples thus there are thirty-six items.
