

SAHRIS OBJECT PDF REPORT

Object Code: KAROO-ISOTOPES-CASEID12935

Quantity: 84.00

Cultural Association:

Maker:

Production Place:

Description:

Utilise isotope studies on apatite from the large collection of stratigraphically collected Late Permian and Early Triassic tetrapods from the Karoo rocks to understand when the elevated thermometabolism (warm-bloodedness) originated in non-cynodonts Therapsida ("mammal-like reptiles").
