

SAHRIS OBJECT PDF REPORT

Object Code: UMBELILAYER-SEDIMENT-
CASEID13475

Quantity: 5.00

Cultural Association:

Maker:

Production Place:

Description:

Umbeli Belli provides a deep stratigraphic sequence of more than 2 m spanning time periods from the MSA and LSA. In order to get reliable datings for the lowermost units 12, 11b and 10 we need to export 3 sediment samples for the purpose of OSL dating. Furthermore we want to understand site formation processes using micromorphology. therefore we need to export 8 sediment samples
